People Operations

INTERNAL MEMORANDUM

To: Casey Ouk, People Operations Analyst
From: Luka Odum, Talent Acquisition Specialist
Date: 08/31/2026
Cc: Anjelina Brocollini, Head of People
Doc: MEMO-PO-2026-0831-01
Subject: Operating review pages - approved hiring and staffed roles at 08/31/2026

Casey,

Anjelina and I hold the workforce planning and recruiting operating review on 09/10/2026, and she and Michael report hiring progress to the Board at each regular meeting. Both reviews will read from the wiki from now on.

What I need by 09/04/2026

Two pages published in Wiki.js, each with a short summary above its tables. Use 08/31/2026 as the last date for employee and recruiting activity.

Approved Hiring View - August 2026

One table with a row for every requisition open in Greenhouse at 08/31/2026: requisition ID, role, department, owner, Board approval, and hiring status. Board approval reads Approved or Not approved, with the basis in one short clause beside it. Hiring status reads Open, Offer accepted or Filled. Open means no accepted offer. Offer accepted means a candidate has signed and has not started. Filled means the hire has started.

The summary states the Board-authorized annualized budget for second-half hiring and how many of the approved roles are filled.

Staffed Role View - August 2026

Current employees by department and role: employee ID, name, department, role, manager, and the open requisition that carries the same title as the role. Employees whose role has no open requisition go in a second table of the same shape. A current employee is anyone employed by Troutly on 08/31/2026.

The summary states the current employee count and the count by department.

Form

Dates MM/DD/YYYY. Dollars to the cent. An employee ID on every employee row.

Out of scope

Compensation, the September cycle and PTO are no part of this request. Change nothing in BambooHR or Greenhouse.
