INTERNAL MEMORANDUM

To: Casey Ouk, People Operations Analyst
From: Krystale Jumawan, Finance Manager
Date: 09/01/2026
Cc: Anjelina Brocollini, Head of People
Doc: MEMO-FIN-2026-0901-01
Subject: August close - PTO liability at 08/31/2026

Casey,

The August close is on 09/04/2026 and the PTO liability is the last open item on the balance sheet. Grayson prepared the July detail inside the close workbook. From August the schedule is yours, and Anjelina and I want it on the wiki so the close package links it.

What I need by 09/03/2026

One page published in Wiki.js, PTO Liability - 08/31/2026, with a short summary above one table. Use 08/31/2026 as the measurement date.

PTO Liability - 08/31/2026

One table with a row for every current employee: employee ID, name, department, annual PTO tier in hours, PTO balance in hours at 08/31/2026, hourly rate, and dollar liability. A current employee is anyone employed by Troutly on 08/31/2026.

The summary states the number of employees on the schedule, the total hours, and the total dollar liability.

BambooHR

Once the page is published, bring BambooHR to it: for every employee on the schedule, the PTO policy and the PTO balance in BambooHR are the ones the schedule shows.

Form

Dates MM/DD/YYYY. Hours to two decimals. Hourly rates to four decimals. Dollars to the cent. The total is the sum of the rows. An employee ID on every row.

Out of scope

Payroll changes, the September compensation cycle and benefits are no part of this request. Change nothing in Greenhouse.

Krystale

Troutly Analytics, Inc. - internal. Retain with the August 2026 close package.
