Second-Half 2026 Hiring Plan

— Board Approved —

Date: June 20, 2026
Prepared by: Michael Labeson, Chief Executive Officer and Co-founder
Approving body: Board of Directors
Board action: Approved at the 06/20/2026 board meeting

Summary

The Board approves the following second-half 2026 hires at a total annualized budget of \$612,000.00, plus one conditional Customer Success backfill authorized only if a Customer Success departure occurs before 09/30/2026.

Salary midpoints in this plan are drawn from the DRAFT 2026 compensation band table circulated in advance of this meeting. Any offer written against these authorizations must be leveled to the position listed and priced at or within a reasonable spread of the referenced midpoint. Requisitions in the applicant-tracking system must be opened against the authorizations enumerated below; no other requisitions are authorized by this Board action.

Approval Reference

Approved this 20th day of June, 2026, by the Board of Directors of Troutly Analytics, Inc., upon motion duly made, seconded, and carried. This document constitutes the written record of the Board's authorization for second-half 2026 hiring and supersedes any prior draft, working spreadsheet, or informal circulation on the same subject.

Approved Role Table

The following five roles are authorized for hire during the second half of calendar year 2026. Salary figures are annualized at the DRAFT 2026 band midpoint for each level.

#	Role	Level	Department	Hiring Manager	Annualized Midpoint
1	Senior Software Engineer	IC4	Engineering	Jessica Ko	\$152,000.00
2	Software Engineer II	IC3	Engineering	Jessica Ko	\$128,000.00
3	Account Executive	AE	Sales	Michael Labeson	\$98,000.00
4	Customer Success Manager	CSM I	Customer Success	Edith Bustamante	\$96,000.00
5	Product Designer	IC3	Product	Sora Jackson	\$118,000.00
Subtotal — base salary at midpoint					\$592,000.00
Recruiting spread & benefits-overhead reserve					\$20,000.00
TOTAL ANNUALIZED BUDGET					\$612,000.00

The \$20,000.00 reserve line is provided to accommodate minor within-band spreads above or below midpoint and to cover incremental benefits-overhead on the approved roles. It is not a discretionary hiring pool and may not be used to fund any position not enumerated above.

Conditional Backfill (separate authorization)

The Board separately authorizes, on a conditional basis only, one Customer Success backfill hire:

Role	Level	Department	Condition	Annualized Midpoint
Customer Success Backfill (conditional, CSM I)	CSM I	Customer Success	Authorized only upon a Customer Success departure before 09/30/2026	\$96,000.00

If no Customer Success departure occurs on or before 09/30/2026, this conditional authorization lapses automatically and no requisition may be opened against it. If a departure does occur before 09/30/2026, the backfill is opened against this authorization at the midpoint stated above.

The conditional backfill is intentionally excluded from the \$612,000.00 annualized budget above. Because the backfill replaces a departing headcount, the incremental annualized impact is expected to be net-neutral to the plan; it is enumerated as a distinct authorization only so that a requisition may be opened without a further Board vote once the triggering condition is met.

Appendix and Signatures

A. Notes on Compensation References

The salary midpoints used throughout this plan are drawn from the DRAFT 2026 compensation band table reviewed by the Board in advance of the 06/20/2026 meeting. Finance will issue the final compensation bands memo separately; the midpoints stated in this plan are those of the draft table for the five roles listed above and for the CSM I backfill.

Individual offers written against these authorizations may be positioned within a reasonable spread of midpoint, subject to the leveling rules and the written-approval requirements set out in the current compensation policy (base-salary changes require written approval signed by the manager and by the Chief Executive Officer or the Chief Technology Officer). No offer may be written at a level other than the level listed above without a separate authorization.

B. Requisition Discipline

Requisitions opened in the applicant-tracking system for the second-half 2026 period must be traceable line-for-line to the authorizations on Page 2. Any requisition that is not traceable to a Board-approved line — whether opened from a working spreadsheet, a draft plan, or any other source — is not authorized and shall be closed or held pending a further Board action.

C. Reporting

The Head of People and the Chief Executive Officer shall report progress against this plan at each regular Board meeting during the second half of 2026, including: (i) requisitions opened, (ii) offers extended and accepted, (iii) start dates, and (iv) actual annualized commitment against the \$612,000.00 authorized budget.

D. Board Attestation

The undersigned Chief Executive Officer certifies that the foregoing plan was presented to, and approved by, the Board of Directors of Troutly Analytics, Inc. at its meeting held on 06/20/2026, and that this document accurately reflects the action taken by the Board at that meeting.

Signed:

/s/ Michael Labeson
