Re: Group Medical Plan Renewal — Plan Year Beginning 09/01/2026

Dear Anjelina and Michael,

Please find attached the 09/01/2026 renewal for the Troutly Analytics medical plan. The carrier has released final rates, and the plan is on-cycle for the anniversary date. This package contains the items you will need to complete renewal on time and to instruct payroll on the updated employee contributions.

The renewal is comprised of the following:

1. A cover summary (this letter), addressed jointly to People and to the CEO in keeping with the group's standing sign-off practice for annual benefits changes.
2. The **Renewal Rate Table** for the 09/01/2026 – 08/31/2027 plan year, presenting the composite monthly premium at each of the four enrollment tiers. The rate table appears on the following page.
3. Confirmation that no plan provisions, eligibility rules, enrollment tiers, or contribution formulas are being modified at renewal. The specific carry-forward language is set out on the following page, immediately below the rate table, so that People Operations and Finance can point to it in a single place.
4. A request for the group's updated **Eligibility Census**, together with the return deadline and the method by which it should be transmitted. That instruction, and my signature block, appear on the third page.

I want to flag that the composite monthly premium has moved at each tier and that the employer / employee split will therefore recalculate off the renewal Employee Only rate as of 09/01/2026. The percentage formula itself has not changed; only the underlying premium schedule has. Payroll should apply the new deduction beginning with the first payroll after 09/01/2026 that draws deductions for September coverage.

If anything in the attached is unclear, or if the group would like me to sit in on the internal handoff meeting to Payroll, please let me know and I will make time this week or next. I will be checking email daily through the census due date and will confirm receipt of the census file within one business day of it landing.

With thanks for the continued relationship,

Claudia Bong

RENEWAL RATE TABLE

Troutly Analytics, Inc. — Group Medical Plan

Plan Year: 09/01/2026 through 08/31/2027

Basis: composite monthly premium, per enrolled employee, by enrollment tier

Enrollment Tier	Monthly Premium (USD)
Employee Only	\$612.40
Employee plus Spouse	\$1,285.20
Employee plus Children	\$1,163.60
Family	\$1,836.90

Premiums shown are the total composite monthly cost of coverage per enrolled employee at each tier. They are the amounts billed by the carrier to the group; they are not the employee payroll deduction. The employee payroll deduction at each tier is calculated by the group in accordance with the contribution rule set out in the plan document and restated below.

Continuation of Plan Provisions

All plan provisions of the current plan document, including the eligibility terms in section 2 (regularly scheduled 30 or more hours per week, coverage effective the first day of the month following 30 days of eligible employment), the enrollment tiers in section 3, and the contribution rule in section 4 (the company pays 80 percent of the Employee Only premium toward every tier and the employee pays the balance), continue unchanged for the plan year beginning 09/01/2026. Only the premium schedule changes.

No amendment to the plan document is required to give effect to the renewal. A wrap-around amendment or SMM is not being issued because the plan text is not being altered; the renewal rate schedule attaches to the existing plan document as its Schedule of Premiums for the new plan year, in the same manner as in prior renewals.

(census request and signature block on the next page)

ELIGIBILITY CENSUS — REQUEST AND DUE DATE

To finalize the 09/01/2026 renewal and place the group in-force at the new rates, I need the group's current **Eligibility Census** returned to Lampasas Benefits Group no later than **09/12/2026**.

Please prepare the census as of a run-date no earlier than 09/01/2026 and include, at a minimum, the following per active employee:

1. Employee identifier and legal name.
2. Date of hire and, where different, benefits-eligibility date.
3. Regularly scheduled hours per week (this drives eligibility under section 2 of the plan document).
4. Current enrollment tier election for the 09/01/2026 plan year, or an explicit waiver.
5. Covered dependents (name, relationship, date of birth) for each enrolled employee electing a tier above Employee Only.
6. Any 2026 mid-year qualifying life event elections that People Operations has recorded but that may not have been reflected on the last census I received.

The census may be sent to me by encrypted email at **cbong@lampasasbenefits.com** or uploaded to the secure client portal using the group's existing credentials. If either transmission method is inconvenient this cycle, please call me and we will arrange an alternative.

Once the census is in hand, I will:

- Reconcile it against the carrier's current enrollment file.
- Prepare the tier-level and per-enrollee monthly cost workbook for Payroll and Finance, applying the 80 percent Employee Only contribution rule described on the preceding page.
- Confirm effective-date placement for any employees whose eligibility date under the section 2 rule falls on or after 09/01/2026.

If any employee's eligibility hinges on the section 2 hours threshold (regularly scheduled 30 or more hours per week) and there is doubt about their scheduled hours as of the census run-date, please flag them in a separate tab of the return file so that we can resolve them together before the census is transmitted to the carrier.

I will confirm receipt of the census file within one business day. If I have not heard from you by 09/09/2026, I will send a reminder.

Thank you again for the continued opportunity to serve Troutly Analytics.

Sincerely,

/s/ Claudia Bong
