People Operations

INTERNAL MEMORANDUM

To: Casey Ouk, People Operations Analyst
From: Luka Odum, Talent Acquisition Specialist
Date: 08/31/2026
Cc: Anjelina Brocollini, Head of People
Doc: MEMO-PO-2026-0831-01
Subject: Operating review pages - approved hiring and staffed roles at 08/31/2026

Casey,

Anjelina and I hold the workforce planning and recruiting operating review on 09/10/2026, and under the 06/20/2026 Board resolution she and Michael report hiring progress at each regular Board meeting. Both reviews will read from the wiki from now on. The People Metrics page has us at 57 people and 8 open requisitions, and the Hiring Plan page carries the 8 roles at \$868,000.00. That is what Anjelina and I have been working from.

What I need by 09/04/2026

Two pages published in Wiki.js, each with a short reconciliation summary above its tables. Use 08/31/2026 as the last date for employee and recruiting activity.

Approved Hiring View - August 2026

One table with a row for every requisition open in Greenhouse at 08/31/2026: requisition ID, role, department, owner, Board approval, hiring status, and the source date for the status. For Board approval, read the 06/20/2026 Board-approved hiring plan and the Board minutes of that meeting, and no other record. Board approval reads Approved or Not approved, with the basis in one short clause beside it. Hiring status reads Open, Offer accepted or Filled. The source date is the date of the latest record that supports the status.

Under it, a second table for recruiting records with no matching BambooHR employee record: candidate, requisition, role, recruiting status, start date, working at 08/31/2026 as Yes or No, and BambooHR record as Yes or No. Keep the two tables apart. An approved role that is still open is not a recruiting record.

The summary on this page states the Board-authorized annualized budget, how many of the approved roles are filled, and the reconciling items between the open requisitions and the Board plan.

Staffed Role View - August 2026

Current employees by department and role: employee ID, name, department, role, manager, and the open requisition that carries the same title as the role. Employees whose role has no open requisition go in a second table of the same shape, so the two staffing pictures stay apart. Count people the way the People Metrics page describes. Managers and reporting lines come from the August org chart.

The summary on this page states the current employee count, the count by department, and the reconciling items between that count and the BambooHR active record count.

Lookups

The Hiring Plan page, the People Metrics page and the Team Directory page are lookups for role titles, the headcount method and reporting lines, and nothing more.

Form

Dates MM/DD/YYYY. Dollars to the cent. An employee ID on every employee row.

Out of scope

Compensation, the September cycle and PTO are no part of this request. Change nothing in BambooHR or Greenhouse.
